MATE IN OIL FILTRATION

SynTec Features

- Very high initial efficiency (99.8% efficiency at 25µm)
- 15,000 kilometre service life
- Engineered to exceed original equipment
- Low restriction to flow (excellent at start up and when cold)
- High temperature resistance (up to 260°C)
- High resistance to chemical attack

SynTec Benefits

- High efficiency means much cleaner engine oil
- High efficiency for the ultimate engine protection
- Simply the best oil filter available for everyday car owners who want to really look after their vehicles engine

It's all in the media

Ryco SynTec High Efficiency Media is made using the latest manufacturing techniques, which includes the use of Nano Fibres. These provide a tightly woven synthetic media, with a dense tortuous path, designed to trap more dirt as oil moves through it, without increasing the pressure drop across the filter. The efficiency and life rating of this filter ensures that it maintains a life of 15,000 kilometres while not compromising the flow of oil.
